

Worker Students

The Democratic People's Republic of Korea has well-regulated study-while-you-work systems of various kinds.

The workers can learn advanced technology and attend university courses through sci-tech learning spaces and nationwide online education system.

These systems have produced a large number of graduates, many of whom are famous inventors and even PhD holders.

Students of a college of technology attend the study-while-you-work system.

Workers study at the sci-tech learning spaces in their factories.

Workers have lectures through distance education course.
